Pits & Bits is the ultimate way to wash effectively without water or rinsing.

What is Pits & Bits

Designed to improve basic hygiene levels & lightweight enough to fit comfortably in your rucksack, Pits & Bits allows you to go further, saving essential water for cooking and drinking! Pits & Bits is a range of liquid soap's & shampoo's that really clean you effectively without any additional water or rinsing. Using our specialist "Towel Off" Technology

Step by Step

To use apply the kind & gentle liquid directly to the area, massage to lift dirt, sweat and odours into the solution. Whilst wet and soapy, remove by thoroughly towel drying. Made from the kindest ingredients, vegan, pH balanced and biodegradable; Pits & Bits is very kind to the skin & ideal for long term use.

Eco Pledge

The world is going into regular droughts, the seas are still polluted and over fished, there's far too much air pollution and issues with waste management. Sadly the list of errors from a long time ago, is still rippling through our infrastructure. So what are we going to do about it? Well... lets innovate and change what we can.

Unfortunately plastic is here to stay. At least until a viable, resistant, biodegradable material transition can take effect. It is therefore the conclusion at Pits and Bits that the only way to tip the balance right now is to use as much recycled material as possible.

Unfortunately the minimal tax the government has implemented on "upto" 30% PCR plastic does not incentivise recycled plastic use. Virgin based polymer is still far cheaper

THAT IS JUST CRAZY! We decided a different approach was necessary as part of the global crisis and to take a hit where raw materials are concerned, Pits and Bits have committed to the following -

- 100% Compostable bags and wipes
- 100% Recycled labels
- 100% Renewable energy
- A minimum of 50-100% PCR bottles
- 100% recyclable packaging
- FSC accredited cardboard (sustainable wood)
- Organised environmental events
- Ethical Awards by The Good Shopping Guide
- Cruelty Free and Vegan friendly
- ISO documented environmental policies
- Made in the UK, reducing carbon footprint

Who is it for?

Camping & motorhomes
Backpacking & travelling
Festivals & events
Sports & mudruns

About Us

Manufacturing in the UK from the family that developed life changing products for those convalescing in hospitals, Pits and Bits was born. With all the experience and know-how in the cosmetics world it became apparent that water and hygiene solutions we're going to be an area of concern in the future and the next step became developing a range for those who enjoy the outdoors, with a focus on how washing would impact the earth. An eco alternative to endless wipes and diesel generating showers is essential.
