

Affected product: 9 Series Hob.

Affected part numbers (if applicable): Models starting SHB94

Product change: The glass thickness will be reduced from 6mm to 5mm, and the outer shape of the hob will be changed from curved with rounded corners, to a rectangular shape.

Picture of change:

Reason for change: Help improve the production efficiency and supply chain issues. 6mm glass is not used on many cooking products, and 5mm glass is much more common in use and perfectly suitable for this type of hob. All Topline Series 900 and Series 160 hobs use 5mm glass for the base surface. The shape will be changed to a rectangle, which also gives the hob a more modern look, aligned with the rest of Thetford's glass countertop hob portfolio.

Date of change: Production builds from January 2022.

Serial code: n/a

Part Number Changes: No, will be a rolling change.
