What kind of caravanner are you? Novice, occasional, enthusiast?
What kind of awning are you looking for? At first sight, all awnings look similar, so what are the real differences?

Tested over time. For more than 20 years, the TRIO awnings have set standards in terms of their quality, longevity and hard-wearing materials. As the years go by and you continue to use your awning, the fabric still remains flexible and strong, the seams remain unchanged, and the colours do not fade. The awning has the same quality and high level of comfort which appealed to you from the beginning.

Standing the test of time is only possible thanks to the choice of the best components and to the specific designs of the TRIO awnings. The components used are of the highest quality in their field (280 g/m² acrylic fabric, YKK zips ...), the strong seams and different reinforced protections are a guarantee of longevity.

We are happy to present to you a full range with two new models. We have introduced new colours and created new designs, by keeping the material and the specifications which have made the reputation of the TRIO awnings - that of quality and strength.

Superior quality, longevity and comfort... are the results of the choice of the best components and of some manufacturing processes you only find on TRIO awnings.

Trio fabric:
100% acrylic - 280 gr/m². The quality of an awning is mainly due to the quality of the fabric. Its lifespan depends upon it. We only use a 280 g/m² acrylic fabric. High quality, flexible, well-ventilated and especially strong, this fabric is extremely resistant to friction and is exceptionally waterproof.

Dope-dyed fibres:
The colours of our awnings have a very long lifespan due to their 100% dope-dyed fibres. You can use your awning for many years in all possible weather conditions - sun, light and humidity will not affect its appearance.

Seams and zips of exceptional quality: We take great care of seams and of zips in order to guarantee strength and waterproofing. YKK zips are fitted to our entire range.

Flag stitched straps: The straps of the Trio awnings have been flag stitched to give the utmost strength when the awning is erected. The outer seams are reinforced inside the awning with 450 g/m² PVC, making the complete assembly tear-proof.

Patterned Roof: On Mexico, Viking, Carrousel and Castle, you’ll find a nicely patterned roof, which adds a further dimension to the awning design.

Built to last: The seam between the roof and the front part of the awning is protected against friction with the frame through a band of reinforced fabric. (Mexico and Viking models only).

Aluminium Curtain Rods: You’ll find them in most Trio models. They’re light and convenient, never rust and look like new even after 10 years. There’s no better choice in terms of convenience and lifespan.

Trifix All frames are equipped with the Trifix fixing system which allows optimal placing of rafter poles without screwing.

New addition - Quicker and easier
The Frame of the Trio Castle uses the new Trio Grip system, a pole hinge which helps with the erection and the dismantling of your awning, and guarantees a greater strength during windy weather.

Fibre glass frame for quicker set-up
Light and strong fibre glass Trio frames include a minimal number of tubes. The pitching is particularly easy and quick.

Alloy Frames
As an option, our models Mini, Midi and Maxi can be delivered with a numbered, light and solid alloy frame. Steel corners guarantee the solidity of the porch.

TRIO Frames - very easy to erect.

Trio Exclusivity - the Trio steel frame is numbered for user-friendly set-up
On each tube of a Trio frame there is an engraved number. The erection instructions delivered with the awning show the respective spot on each tube, number by number. So when setting up your awning, each tube can be easily located thus saving a lot of time.

2 year guarantee
All Trio awnings are checked individually at the end of the production line and are guaranteed against all manufacturing faults for two years. Should you discover any manufacturing faults, they will be repaired free of charge.

Patterned Roof: On Mexico, Viking, Carrousel and Castle, you’ll find a nicely patterned roof, which adds a further dimension to the awning design.

Built to last: The seam between the roof and the front part of the awning is protected against friction with the frame through a band of reinforced fabric. (Mexico and Viking models only).

Aluminium Curtain Rods: You’ll find them in most Trio models. They’re light and convenient, never rust and look like new even after 10 years. There’s no better choice in terms of convenience and lifespan.
The combination of the typical TRIO columns, of light curves and large windows creates a brilliant awning, a unique mixture of style and stability. Available in 3 new exclusive colours, the Carrousel is equipped with a combined fibre glass and steel frame which is both lightweight and solid.

The ventilation system was created to increase the passage of air and to reduce condensation when raining. Every side of the awning is equipped with a mosquito net protected by a shutter fitted with ties. Two ventilators in the front, situated just below the apex, are covered by zipped shutters. This system allows ventilation through the awning even in your absence - rain will not enter.

You'll like:
- The 2.5m depth
- The canvas quality, 100% acrylic 280 g/m², dope-dyed fibre, with reinforced pegging straps
- The patterned roof in coated polyester
- The combined fibre glass and steel frame of the Carrousel, that guarantees solidity but remains light to transport and easy to setup. The upright poles are made from fibre glass and the roof poles steel.
- The 2 front panels which can be rolled to the side or zipped out
- The new ventilation system
- The 3 new colours: Trio blue, Trio red and Trio green, with silver and sand contrasting colours
- The possibility to use a tall annex of the same colour as the awning. You can turn it into a bedroom annex by using an inner tent.
- The availability of sizes from 900 to 1125
The Castle combines the TRIO qualities of solidity and comfort with modern colours. Its steel frame is delivered with the TRIO - Grip system.

Optimum ventilation thanks to mosquito nets on both sides, protected by shutters, and 2 vents in the front with zip closures.

You’ll like:
- The 2,5m depth
- The canvas quality, 100% acrylic 280 g/m², dope-dyed fibre, with reinforced pegging straps
- The patterned roof in coated polyester
- The choice between a numbered steel frame with Trio grip and a fibre glass frame
- The 2 or 4 front panels, which can be rolled down or zipped out
- The new Trio blue, a stylish mix of dark blue, silver and sand
- The possibility to use a tall annex of the same colour as the awning. You can turn it into a bedroom annex by using an inner tent.
- The availability of sizes from 900 - 1100.

Trio grip system - quicker and easier
The frame of the Castle uses the new Trio Grip system, a pole hinge which facilitates the quick erection and dismantling of your awning. An optional fibre glass frame is available.
Used by several thousand caravanners in Europe, the best seller of all the TRIO products remains excellent value: a solid, spacious and very comfortable awning which offers great stability.

Inside the awning there is maximum ventilation thanks to a large mosquito net on the side panel, protected by an outside shutter which can also be used as a canopy.

You’ll like:

- The 2.5m depth
- The canvas quality, 100% acrylic 280 g/m², dope-dyed fibre, with reinforced pegging straps
- The patterned roof in coated polyester
- The numbered steel frame, or alternatively the fibre glass frame
- The 2 or 4 front panels which can be rolled down or zipped out
- The large mosquito net on the side
- The 3 sets of colours - blue/grey, red/grey or green/grey
- The possibility to use a tall or a bedroom annex of the same colour as the awning
- The availability of sizes from 875 to 1200
The TRIO comfort in its XXL version:
a 3 metre depth awning, solid and stable, including every quality feature you expect from a top of the range product.

You’ll like:
• The benefits of its 3m depth
• The quality of the canvas, 100% acrylic 280 g/m², dope-dyed fibre, with reinforced pegging straps
• The patterned roof in coated polyester
• The numbered steel frame, or alternatively the fibre glass frame
• The 2 or 4 front panels which can be rolled down or zipped out
• The large mosquito net on the side
• The possibility to use a tall or a bedroom annex of the same colour as the awning
• The availability of sizes from 900 to 1200

The best of the TRIO quality at the best possible price.

You’ll like:
• The 2,5m Depth
• The canvas quality, 100% Acrylic 280 g/m², dope-dyed fibre
• The numbered steel frame, or alternatively the fibre glass frame
• The external mudwall that drives rainwater 20 cm away from the awning. Please note that pegging straps are not flag stitched on the Family
• The 2 or 4 front panels, which can be rolled down or zipped out
• The choice of 3 colourways, blue/grey, red/grey or green/grey
• The possibility to use a tall or a bedroom annex of the same colour as the awning
• The availability of sizes from 850 to 1200
## Mini / Midi / Maxi

Looking for a caravan porch of superior quality, easy to erect and manufactured to last? Here’s your choice of 3 top of the range products available in 3 colourways. Whatever your needs, their quality and specification will please you.

### You’ll like:
- The choice between **Mini** width 2.5m, **Midi** 3.25m and **Maxi** 4 m all with a generous 2.1m depth
- The solidity of the material, acrylic 280 g/m², dope-dyed fibre
- The choice between a numbered steel frame and a numbered alloy frame
- The side ventilation
- The double mudwall on the Midi and Maxi or the external mudwall on the Mini that drive rainwater away from the porch
- The choice of 3 three different colours blue, red or green
